PROFESSIONAL SUMMARY

Data Analytics student graduating December 2026 with hands-on experience using Python, SQL, R, Power BI, and Tableau to clean, analyze, and visualize data. Completed projects in Medicare risk adjustment and employee attrition modeling and brings nearly three years of Medicare advisory experience interpreting regulated plans and customer information. Seeking a healthcare data, business intelligence, reporting, or operations analytics role.

TECHNICAL SKILLS

Languages: Python, SQL, R

Analytics and Machine Learning: pandas, NumPy, scikit-learn, Matplotlib, Seaborn

Visualization and Reporting: Power BI, Tableau, Microsoft Excel

Databases and Development: MySQL, SQLAlchemy, PyMySQL, Jupyter Notebook, VS Code

PROJECTS

Medicare Risk Adjustment Analysis

2026

Python | pandas | NumPy | MySQL | SQLAlchemy | PyMySQL | Matplotlib

- Built a reproducible data pipeline to ingest, clean, validate, and standardize multi-year CMS Medicare risk adjustment datasets for analysis.
- Loaded analysis-ready data into MySQL with SQLAlchemy and PyMySQL, supporting structured queries and reusable downstream analysis.
- Explored risk-adjustment patterns and created visual summaries with Matplotlib and Seaborn to communicate healthcare analytics findings.

Employee Attrition Prediction

2026

DAT-430 Course Project | Python | pandas | Random Forest | AdaBoost | Power BI

- Merged two HR datasets into a 1,470-record, 30-feature dataset and prepared categorical variables for predictive modeling.
- Built and evaluated Random Forest and AdaBoost classifiers using a 70/30 train-test split; AdaBoost achieved 88.4% test accuracy, a 0.765 F1 score, and 0.904 ROC AUC.
- Exported attrition predictions and risk probabilities, then developed a Power BI dashboard examining patterns by overtime, income, department, and job role.

PROFESSIONAL EXPERIENCE

Spring Venture Group | Medicare Advisor | Remote

May 2023 - March 2026

- Maintained accurate customer and enrollment records in a regulated Medicare environment while protecting sensitive personal information.
- Evaluated client needs, coverage requirements, and plan details to recommend appropriate Medicare options.
- Interpreted Medicare regulations and complex plan documentation to resolve client questions and support informed decisions.

Best Buy | Sales Associate | College Station, TX

August 2018 - May 2023

- Analyzed customer needs and product specifications to recommend technology solutions and improve the buying experience.
- Used product trends, customer feedback, and sales data to adapt recommendations and consistently meet or exceed sales goals.

EDUCATION

Southern New Hampshire University

Expected December 2026

Bachelor of Science in Data Analytics

Relevant Coursework: Data Visualization, Statistical Analysis, Database Management, Machine Learning
